Berlin, Germany | +49 15565827420 | [Email](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

M.Sc. Software Engineering student at the University of Europe for Applied Sciences with professional experience developing and maintaining software applications using Java, Python, JavaScript, and REST APIs. Experienced in backend development, API integration, debugging, SQL databases, and Agile software development. Built practical projects involving Spring Boot, Node.js, automation, and data processing. Focused on building reliable software, applying clean engineering practices, and contributing effectively to collaborative development teams.

Key Skills

Programming Languages: Java, Python, JavaScript, TypeScript, C++

Backend & APIs: Spring Boot, Node.js, REST APIs, API Integration, JWT Authentication

Frontend: React, HTML5, CSS3

Databases: SQL, MySQL

Cloud & DevOps: AWS (Learning), Docker (Learning), CI/CD

Tools: Git, GitHub, Maven, Postman, VS Code, IntelliJ IDEA

Engineering Practices: Object-Oriented Programming, Agile Development, Software Design, Debugging, Testing, Version Control

Soft Skills: Communication, Teamwork

Languages: English - C1, German - A2

Professional Experience

Software Engineer

IT Codes, India (Mar 2024 - Sep 2024)

- Developed and integrated REST APIs for enterprise web applications, improving backend functionality and maintainability.
- Integrated backend APIs supporting real-time geospatial data processing.
- Collaborated with cross-functional Agile teams to deliver software across multiple development and release cycles.
- Debugged application issues and contributed to software quality, validation, and reliability improvements.

Software Developer Intern

Microtel Netlinks Ltd., India (Aug 2023 - Jan 2024)

- Developed and maintained web application modules within an Agile development environment.
- Investigated and resolved 15+ software defects and functionality issues during development cycles.
- Participated in sprint planning, testing, and release activities while collaborating with developers.

Education

M.Sc. Software Engineering - University of Europe for Applied Sciences, Potsdam, Germany (Sep 2025 - Present)

Bachelor of Computer Applications (BCA) - Veer Narmad South Gujarat University (VNSGU), India (Graduated 2023)

Projects

AI-Powered Job Search & Shortlisting System (Python, NLP, Automation, Git) - ([Repo](#))

- Developed a Python-based automation platform that collects and filters 100+ job postings based on defined criteria.
- Implemented TF-IDF similarity scoring to rank opportunities and improve matching relevance automatically.
- Automated data collection and filtering workflows to reduce manual effort.
- Designed modular Python workflows with a focus on maintainability, automation, and clean code practices.

Coding Application Backend (Java, Spring Boot, MySQL, JWT, Maven) ([Repo](#))

- Developed a RESTful backend using Java and Spring Boot for a coding application.
- Implemented JWT-based authentication and authorization with role-aware API access.
- Integrated MySQL for persistent data management and designed modular service and controller layers.
- Tested and documented REST APIs using Postman while following Git-based development practices.

TechnoCloud - Cloud-Based Music Streaming Platform (In Progress) (JavaScript, Node.js, REST APIs) ([Repo](#))

- Developing backend services using Node.js and REST APIs.
- Implementing authentication and API communication.
- Designing scalable backend services using modular architecture principles.
- Collaborated using Git-based version control in an Agile development workflow.

Parallel Sorting System (C++)

- Developed and tested parallel sorting algorithms using modern C++ and multithreading concepts.
- Benchmarked execution performance across datasets containing 10,000+ records.
- Verified algorithm correctness through performance benchmarking and testing.
